SKILLS

FRONTEND - HTML, CSS, JAVASCRIPT, TYPESCRIPT, BOOTSTRAP
BACKEND - PHP, LARAVEL.
DATABASES – MYSQL, MONGO DB
FRAMEWORK – REACT & GSAP.
API - REST

PROJECT

Employee Management System |React, Tailwind, Bootstrap| 10/2024 – 11/2024

I have created an Employee Management System (EMS) that streamlines task management by allowing you to add employees, assign tasks, and track progress through four status categories: New for newly created tasks, accept for tasks that are taken up by employees, Complete for successfully finished tasks, and Failed for tasks that were not completed. This system enhances team productivity by providing a clear and organized workflow for task assignments and monitoring all the task at one of all assigned users.

WORK EXPERIENCE

Zillion Softech   05/2023 – 06/2024

Full Stack Developer

• AS an intern managed various project tasks including coordinating team activities, tracking project progress, and ensuring deadlines were met. Assisted in project planning and execution, including task assignment, progress monitoring, and documentation. Utilized project management tools to facilitate communication and maintain project timelines.

• Developed and maintained user-centric web applications by contributing to both front-end and back-end components, resulting in the successful deployment of five key projects within stringent deadlines throughout the internship where I gained valuable exposure to the workplace environment and was able to apply the concepts learned in my studies to real-world challenges during my intership

ACHIEVEMENTS

• Achieve the **Knight Badge on LeetCode solving 1000+** coding problems and attaining a contest rating of 1120 pleasing in the top 9% coders.

• Secured a contest rank of **570 on LeetCode** weekly contest 380

EDUCATION

Maharshi Dayanand University   06/ 2020 – 07/2024
Global Institute OF Technology and Management B. Tech (CSE) - 6.7
